SUMMARY

Year 4 Computer Science & Engineering student at UMaT (80.87 CWA, First Class standing). AWS re/Start graduate with strong cloud software engineering foundations, hands-on security training, and experience building and deploying live web applications (React, Next.js, Node.js, Python, MongoDB, and AWS EC2/Amplify).

EDUCATION

Bachelor of Science in Computer Science and Engineering

Expected 2027

University of Mines and Technology (UMaT), Tarkwa, Ghana

- CWA: 80.87 (First Class standing)
- Relevant coursework: Data Structures & Algorithms, Software Engineering, Artificial Intelligence, Advanced Database Systems, Operating Systems, Embedded System Design, Web Programming, Object-Oriented Programming

High School Diploma / WASSCE

2019 - 2022

Kumasi Academy, Kumasi, Ghana

EXPERIENCE

AWS re/Start Graduate

Jan 2026 - Apr 2026

AmaliTech (Online)

- Completed intensive training in cloud architecture, IAM policies, VPC configuration, EC2, S3 bucket security, Linux systems administration, Python scripting, networking, and relational/NoSQL databases.

PROJECTS & LEADERSHIP

VoteEQ - real election platform used by ACSES

voteeq.online

- Built and deployed a paid nominee voting and event ticketing platform used officially by the UMaT Association of Computer Science and Engineering Students.
- Features Paystack hosted checkout, real-time leaderboard updates via WebSockets, libSQL database, nominee dashboards, and admin tooling. Frontend deployed on Vercel, API hosted on AWS EC2.

Scholar - scholarship matching engine

schorla.vercel.app

- Implements NLP document parsing for CVs, transcripts, and SOPs; executes semantic matching algorithms to align profiles with verified funding opportunities.
- Built with Next.js, LlamaCloud, Supabase, and Stripe billing.

InsightFlow - AI reading assistant

appinsightflow.vercel.app

- Converts books and documents into structured learning paths via RAG pipelines, generating guided text summaries and synthesized audio streams.
- Built with React, Vite, TypeScript, and Supabase.

KaiRova - streetwear e-commerce showcase

kai-rova.vercel.app

- Built a premium clothing catalog and brand experience showcase for a friend's streetwear brand.
- Implemented category catalog filters, interactive detail galleries, size selector drawers, and dynamic user query forms. Built with Next.js 15, TypeScript, Tailwind CSS, and Framer Motion.

AWS re/Start Graduate Hackathon - AI medical queue application

Team Hackathon Project

- Collaborated in a team during the AmaliTech hackathon to design and build a hospital queue management system.
- Implemented user authentication and access control using AWS Cognito, serverless endpoints via Lambda + API Gateway, DynamoDB database, and AWS Amplify frontend hosting.

AmaliTech Coding Club Organizer

- Organized coding workshops, technical bootcamps, and peer-to-peer programming practice sessions.
- Coordinated student mentoring, algorithmic tutorials, and collaborative hacking events.

WORKSHOPS & SEMINARS

AmaliTech Workshop - How to Actually Get Hired in Tech

24 July 2026

CERTIFICATIONS

AWS Certified Cloud Practitioner (CCP)

Amazon Web Services (Credly)

Certified in Cybersecurity (CC)

ISC2

Machine Learning Specialization

Stanford University & DeepLearning.AI (Coursera)

ADDITIONAL TRAINING / CREDENTIALS

Hardware Projects / IoT & Embedded Systems

UMaT / Robotics Club (AAENICS)

- Completed hands-on training and built embedded prototypes using ESP32, MQTT protocols, Embedded C, and Raspberry Pi.

UMaT Cybersecurity Club

2026 - Present

UMaT

- Participated in hands-on technical workshops focused on network scanning and enumeration using Nmap, and database vulnerability exploitation via SQL injection.

TECHNICAL SKILLS

Cloud & Infrastructure: AWS (Amplify, S3, IAM, Lambda, API Gateway, EC2, VPC), GCP, Firebase, Vercel, Docker, Cloud Architecture

Frontend: React, Next.js, TypeScript, Tailwind CSS, Vite, CSS, Three.js

Backend & Databases: Python, Node.js, Supabase, PostgreSQL, Prisma, REST APIs

AI / Machine Learning: Linear & Logistic Regression, Neural Networks, Deep Learning, K-Means Clustering, Recommender Systems, Anomaly Detection, Reinforcement Learning, NLP, RAG

Cybersecurity: Cloud Security, Networking, Information Security, Penetration Testing

IoT / Hardware: ESP32, MQTT, Embedded C, Raspberry Pi

Design: Canva

PROFESSIONAL / TECHNICAL INTERESTS

Cloud Computing, Cloud Security, Cybersecurity, Artificial Intelligence, Machine Learning, Full-Stack Development, Software/Product Development, IoT & Embedded Systems, Entrepreneurship, UI/UX

CV INTERESTS

Building software products, Cloud technologies, Artificial intelligence, Cybersecurity, Entrepreneurship, Emerging technologies, IoT and embedded systems

LANGUAGES
