Executive Profile

Final-year Computer Science & Engineering student specializing in cloud security architecture, defensive web engineering, and high-concurrency production deployments. AWS Certified Cloud Practitioner and ISC2 Certified in Cybersecurity (CC) with 600+ hours of enterprise cloud training through the AmaliTech AWS re/Start program. Architected and deployed live production platforms processing over 7,800 verified financial transactions on hardened AWS EC2 infrastructure.

Core Technical Competencies

Cloud & Infrastructure: AWS (EC2, S3, IAM, VPC, Lambda, Cognito, Amplify), Linux/Bash Systems Administration, Nginx Reverse Proxy

Cybersecurity & Defense: OWASP Top 10 Web Defense, Network Scanning (Nmap), SQL Injection Mitigation, IAM Least-Privilege Policies

Backend & REST APIs: Node.js, Express.js, TypeScript, JavaScript (ES6+), RESTful API Architecture, JWT/Session Auth, WebSockets, Paystack API

Frontend Engineering: React.js, Next.js 15 (App Router), Tailwind CSS, State Management, Responsive Mobile-First Architecture

Databases & Tooling: PostgreSQL, SQLite / Turso, MongoDB, Git / GitHub CI/CD, Postman, Relational Schema Design & ACID Transactions

Featured Production Software Systems

VoteEQ — Live High-Concurrency Voting & Ticketing Platform | *React, Node.js, Express,* <https://voteeq.online>
PostgreSQL/Turso, AWS EC2, Paystack

- Architected and deployed an institutional voting and ticketing platform adopted officially by the UMaT CS Student Association.
- Processed **7,800+ live transactions** with automated Paystack cryptographic webhook verification and idempotent database locks.
- Built real-time WebSocket broadcast feeds for leaderboard sync; hardened production EC2 with SSL, rate-limiting, and CORS guards.

KaiRova — Premium Streetwear E-Commerce & Brand Showcase | *Next.js 15,* <https://kairovaclothing.com>
React, TypeScript, Tailwind CSS, Vercel

- Engineered a modern, responsive commercial e-commerce product with dynamic category catalog filters, lookbooks, and modular components.
- Optimized frontend architecture using Next.js App Router server components, delivering sub-second page transitions and fluid mobile UX.

Scholar — Academic Records & Administrative Management Portal | *Next.js,* <https://schorla.vercel.app>
TypeScript, React, REST APIs, RBAC

- Built an administrative student workflow portal implementing granular Role-Based Access Control (RBAC) and dynamic data querying.

Professional Experience & Technical Leadership

AmaliTech — AWS re/Start Cloud Practitioner Program Takoradi / Online, Ghana
Cloud Practitioner Trainee & Intern *Jan 2026 – Apr 2026*

- Completed 600+ hours of enterprise cloud systems training spanning AWS architecture, Linux administration, and Python automation.
- Configured Virtual Private Clouds (VPC), multi-tier subnet routing, security groups, and automated S3 logging with least-privilege IAM.

AmaliTech Coding Club, UMaT Tarkwa, Ghana
Club Organizer & Technical Lead Mentor *Jan 2026 – Present*

- Facilitated technical bootcamps, algorithmic challenge labs, and code reviews for over **100 engineering students**.
- Mentored junior developers in defensive programming hygiene, Git/GitHub collaborative workflows, and RESTful API engineering.

UMaT Cybersecurity Club Tarkwa, Ghana
Active Technical Member *Jan 2026 – Present*

- Conducted weekly hands-on offensive/defensive labs focusing on network host discovery, port scanning with Nmap, and SQLi mitigation.

Department of Computer Science and Engineering, UMaT Tarkwa, Ghana
Teaching Assistant & Peer Tutor (C# & Data Structures) *2025 – Present*

- Tutored undergraduate students in object-oriented programming (C#), algorithmic complexity, memory management, and databases.

Education & Industry Certifications

University of Mines and Technology (UMaT) Tarkwa, Ghana
BSc in Computer Science and Engineering — Year 4 (Final Year) *2024 – Expected June 2027*

- **Academic Standing:** First Class Honours | Cumulative Weighted Average (**80.87 / 100 CWA**).
- **Core Coursework:** Operating Systems, Computer Networks, Database Systems, Cryptography, Software Engineering, Embedded Systems.

Professional Certifications: AWS Certified Cloud Practitioner (CCP) ([Credly Verified](#)) · ISC2 Certified in Cybersecurity (CC) · Google Cybersecurity Certificate (Coursera / One Million Coders, In Progress) · Machine Learning Specialization (DeepLearning.AI / Stanford, [Verified](#)).
